Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (AI & Data Science)	Indian Institute of Technology Jodhpur	CGPA: 7.00/10.00	2024–2028
Senior Secondary	CBSE (Dharam Public School, Greater Noida)	88.4%	2024
Secondary	CBSE (Dharam Public School, Greater Noida)	87%	2022

Projects

- **ResolveX – Multi-Tenant Issue Management Platform** Live Demo – Source Code *2026*

  Tech Stack: *Python, FastAPI, PostgreSQL, SQLAlchemy, React, TypeScript, Docker*

  – Built a multi-tenant issue management platform where organizations manage support tickets, team members, roles, and workflows through a centralized system.
  – Developed REST APIs with FastAPI and PostgreSQL, implementing JWT authentication, role-based access control, and organization-level data isolation.
  – Designed ticket lifecycle management, activity logs, comments, and in-app notifications, with database migrations using Alembic.

- **MiniRedis – In-Memory Key-Value Store** Source Code *2026*

  Tech Stack: *C++, Hash Tables, Min-Heap, LRU Cache, File I/O*

  – Implemented Redis-inspired SET, GET, DEL, and EXISTS operations using a custom hash table with separate chaining and dynamic rehashing.
  – Implemented TTL-based key expiration using a versioned min-heap and an LRU cache using a hash map and doubly linked list.
  – Added file-based persistence with TTL restoration and tested edge cases to validate correctness and reliability.

- **MindMate AI – Full-Stack RAG-Based Learning Assistant** Live Demo – Source Code *2026*

  Tech Stack: *Node.js, React, PostgreSQL, pgvector, Groq API, Transformers.js*

  – Built a full-stack AI learning assistant supporting conversational AI, PDF-based question answering, and personalized study plan generation.
  – Engineered a custom Node.js HTTP backend with JWT authentication, rate limiting, dynamic Groq model discovery, and PostgreSQL-based data management.
  – Implemented an end-to-end RAG pipeline using PDF parsing, overlapping text chunking, MiniLM embeddings, and pgvector cosine similarity search, enabling context-grounded responses with document and page citations.

Relevant Coursework

Data Structures & Algorithms | Operating Systems | Computer Networks | Machine Learning | Maths for Computing | Probability & Statistics

Technical Skills

Languages: Python, C++, SQL, JavaScript

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Databases: PostgreSQL, Redis , SQLAlchemy

AI/ML: Scikit-learn, TensorFlow, Sentence Transformers

Tools: Git, GitHub, Linux, Docker, Postman, Streamlit

Achievements & Positions of Responsibility

- Solved 500+ Data Structures and Algorithms problems on LeetCode.
- **Public Relations Volunteer, VARCHAS – IIT Jodhpur:** Contributed to sports-fest public relations and supported event communication and participant coordination.
